**Hiring Team**

ILS – Srinagar / Budgam

**Subject: Application for Data Science Trainer**

Dear Hiring Team,

I am writing to express my interest in the Data Science Trainer position at ILS. As a Kashmiri with a Master of Science (M.Sc.) in Information Technology and practical experience in Python, SQL, machine learning, and data analytics, I am excited about the opportunity to contribute to developing the next generation of data professionals in my home region.

Over the past year, I have built a strong practical foundation across the data science lifecycle, including data cleaning, exploratory data analysis, machine learning, and computer vision. During my Data Analytics Internship at 360DigiTMG, I worked with real-world datasets, applying data preprocessing, transformation, and analytical techniques using Python and Excel to support data-driven decision-making.

In addition, I have independently completed several end-to-end projects that strengthened both my technical and problem-solving skills. These include an AI-powered medical image retrieval system using Vision Transformers and VGG16, a Text-to-SQL AI agent that converts natural language into executable SQL queries, and a customer analytics project utilizing K-Means clustering and statistical analysis to derive actionable business insights.

To further enhance my expertise, I have earned certifications in Python, SQL, and Power BI through Simplilearn and Mimo. I also completed a Data Labelling Job Simulation with Forage, where I gained practical exposure to intent classification, sentiment analysis, and personally identifiable information (PII) identification. Throughout my academic and project work, I have frequently helped classmates understand Python programming, data analysis concepts, and machine learning techniques, discovering that I genuinely enjoy simplifying complex technical topics into practical, easy-to-understand lessons.

While I am still building formal classroom teaching experience, I bring a strong and up-to-date technical foundation aligned with the requirements of this role. My experience is rooted in hands-on, project-based learning, and I am passionate about mentoring aspiring data professionals. Having studied at the Islamic University of Science and Technology and Cluster University of Srinagar, I also understand the educational aspirations of students in Kashmir and am committed to helping them build industry-ready skills.

I would be grateful for the opportunity to contribute to ILS's mission of preparing students for successful careers in data science. Thank you for considering my application. I look forward to the opportunity to discuss how my technical knowledge, enthusiasm for teaching, and commitment to student success can benefit your institution.

Yours sincerely,

**Ishfaq Ahmad Dar**
