Featured Projects

1. Al Kawser Islamic Learning Management System

A production ready LMS platform built using React Vite Tailwind CSS and Supabase.

Features

- Role based authentication
- YouTube playlist course import
- Progress tracking
- Resume learning
- Daily streaks
- Certificate generation
- Notes and bookmarks
- Admin dashboard
- Mobile responsive UI

Technologies

React • Vite • Tailwind CSS • Supabase • PostgreSQL • Zustand

2. Real Time IoT Data Processing System

An event driven backend system designed for processing real time IoT device data.

Features

- Kafka based event streaming
- Real time analytics
- WebSocket live updates
- Redis caching

- FastAPI backend
- Docker based deployment
- Scalable architecture

Technologies

Python • FastAPI • Apache Kafka • Redis • PostgreSQL • Docker

3. ZabarWaan Home Solutions Website

A modern full stack business website for a hardware and home fittings company.

Features

- Product catalogue
- Search and filtering
- Responsive frontend
- FastAPI backend
- PostgreSQL integration
- WhatsApp integration
- Docker deployment

Technologies

HTML • CSS • JavaScript • FastAPI • PostgreSQL • Docker • Nginx

4. Ali Nawaz Academy Platform

A modern LMS platform with payment workflow certificate generation and role based access.

Features

- Student and admin dashboards
- Payment screenshot approval
- Dynamic QR generation
- Playlist based courses
- PDF certificates
- Responsive UI

Technologies

React • Vite • Tailwind CSS • Supabase • PostgreSQL

Services I Offer

- Full Stack Web Development
- React Web Applications
- FastAPI Backend Development
- REST API Development
- Admin Dashboard Development
- Authentication Systems
- Database Design
- Ecommerce Functionality
- Deployment and Hosting
- Bug Fixing and Optimization

Why Choose Me

- Modern responsive UI
- Clean scalable code

- Fast communication
- Professional workflow
- On time delivery
- Client satisfaction focused
