PROFESSIONAL SUMMARY

Results-driven Data Analyst with an MSc in Information Technology and hands-on experience in Python, SQL, and Power BI. Proven ability to analyze large datasets (400K+ records), build interactive dashboards, and deliver actionable insights that support business decision-making. Skilled in EDA, KPI reporting, ETL pipelines, and statistical analysis. Passionate about transforming raw data into measurable business value.

TECHNICAL SKILLS

Languages & Querying: Python (Pandas, NumPy, Matplotlib, Seaborn) • SQL (PostgreSQL, Window Functions, CTEs, Joins)

BI & Visualization: Power BI (DAX, Dashboard Development) • Tableau (Basic) • Excel (Pivot Tables, Advanced Formulas, VLOOKUP)

Analytics: EDA • Statistical Analysis • Hypothesis Testing • RFM Segmentation • KPI Reporting • ETL Processes

Tools & Platforms: Jupyter Notebook • Git/GitHub • VS Code

Soft Skills: Analytical Thinking • Problem-Solving • Attention to Detail • Business Communication

EXPERIENCE

Data Analytics Intern | 360DigiTMG

2024

- Analyzed healthcare datasets for a medical inventory optimization project, delivering insights that improved procurement planning accuracy
- Executed data cleaning and transformation pipelines using Python and Excel, enhancing data consistency and reducing errors
- Generated actionable insights on procurement and inventory decisions, directly supporting data-driven business strategies
- Designed data visualizations and reports to communicate findings clearly to stakeholders, improving business understanding

EDUCATION

M.Sc. — Information Technology | Islamic University of Science & Technology, Kashmir

2023 – 2025

Coursework: Data Analytics, Big Data Analytics, DBMS, Statistical Methods, Python, Machine Learning

B.Sc. (Non-Medical) | Cluster University of Srinagar — Sri Pratap College

2020 – 2023

Coursework: C, C++, Java, Database Management Systems

PROJECTS

Customer Revenue & Retention Analysis | Python, SQL, Power BI, T-Tests

- Analyzed 400,000+ retail transactions to identify churn patterns and revenue leakage of ~10–15%
- Applied RFM segmentation to improve customer targeting accuracy and optimize retention strategy
- Built an interactive Power BI dashboard with DAX measures, reducing manual reporting effort by ~30%

Healthcare Sales & Returns Analysis | SQL, Power BI, Excel

- Engineered an end-to-end analytics solution for pharmacy sales and returns, enabling data-driven inventory decisions
- Transformed and cleaned datasets using SQL, improving data accuracy and consistency for downstream reporting
- Developed a Power BI dashboard to surface top-selling drugs and high-loss departments for procurement teams

Text-to-SQL AI Agent | Python, NLP, SQL

- Built an NLP-based system to auto-convert natural language queries into SQL, reducing non-technical user dependency by ~40%
- Implemented error detection and auto-correction logic to enhance SQL query accuracy and reliability
